

CIRSA INJURY PREVENTION SYMPOSIUM

CIRSA's Injury Prevention Seminar will assist members in the development and basic administration of an overall safety & health program. Utilizing a case study format, our multiple speakers will cover the topics listed below in a methodology that will allow you to use the information to build and/or improve your new or existing programs. From developing a training program matrix to following up on all injuries via an incident investigation process, we are certain these seven modules will be of value to your continuous improvement efforts.

AGENDA:

7:30	Registration/Morning Beverages	11:00	Catered Lunch
8:00	Housekeeping/Opening Remarks/Other Event Discussion		Module Five - Prevention Through Design
	Module One - CIRSA Services & Resources (CIRSA Orientation)		Module Six - The Lone Wolf: Can Solo Operations Be Safe?
	Module Two - A Day In The Life - Training Logistics	Break	
Break			Module Seven - Incident Investigations: Identifying the Root Cause
	Module Three - Hierarchy of Controls	3:00	Closing Comments/Questions
	Module Four - Using a JSA: Step by Step Safety
