

# Tips

## EV Charging Stations

- Before installation, an onsite evaluation should be performed.
- Refer to the manufacturer's specifications and guidelines for installing EV charging stations.
- Only licensed electricians and contractors should perform installation, maintenance, and repairs.
- Never store or use flammable, explosive, or combustible vapors or gases near the stations.
- Install bollards to protect the EV stations.
- Develop a maintenance and inspection plan to ensure optimal performance year-round.
- Periodically inspect the EV cable/connector and all other wiring and connections for cracks, broken or missing pieces, and exposed wires.
- Make sure all safety and parking signs are legible and installed correctly.
- All employees should be adequately trained in the potential hazards associated with EV charging stations.
