

REGIONAL TRAINING

CDOT FLAGGER TRAINING

The CIRSA Risk Control team will be hosting five regional CDOT Flagger Training classes for members. This training aims to improve work zone safety as well as provide an understanding of the potential dangers and hazards that are present on roadway construction and maintenance projects. Flaggers play a vital role in protecting both the traveling public and the workers. This 4-hour course follows CDOT's requirements for flagging based on the Flaggers Training Manual, Reference Guide and CDOT's Flagging video.
