INCIDENT & INJURY PREVENTION

LEARNING FROM LOSS: PRACTICAL STRATEGIES FOR RISK REDUCTION

Part of CIRSA's ongoing Incident & Injury Prevention Series. Every loss tells a story – and every story offers an opportunity for change. Join CIRSA for a practical and engaging session that connects real-world member loss data to everyday operations. This presentation explores how incidents happen, why trends persist, and what targeted actions can make the greatest impact with the resources you already have. Topics include:

- An overview of CIRSA member losses and key trends.
- Proven risk management strategies for reducing workplace injuries and illnesses.
- Practical tools for identifying root causes and implementing changes at the operational level.
- Approaches to “moving the needle” even when resources are limited.

Whether you are safety staff, a risk manager, HR personnel, or someone that is responsible for safety initiatives you will leave with actionable steps to help your organization prevent future incidents and protect your most valuable resource – your people.
